REPLIT PROOF OF USE

SDC 2026 preliminary submission attachment

Team	Family Guy	**Project**	Wheat Assistant (wheat_assistant)
Platform	Replit	**Evidence date**	25 October 2026 (MYT)
Proof type	Public live deployment	**Release**	a37ccc68

PUBLIC LIVE DEPLOYMENT

https://wheat-assistant.replit.app

Public interactive prototype; no Replit login is required to open the URL.

Purpose

This attachment records the team's actual use of Replit for the public cloud prototype. It is a proof-of-use attachment and does not replace the Technical & Tools Declaration.

Replit use recorded

Deployment	Replit Published deployment for the public Wheat Assistant prototype; status recorded as Live and Public.
Cloud runtime	Cloud application hosting with scoped synthetic demo workspaces and managed PostgreSQL persistence for cloud records and file bytes.
Development provenance	The repository also retains a sanitized record for the original Replit-developed Status Guard module integrated into the application.

Public verification snapshot

The public deployment was checked on 25 October 2026 (MYT). An anonymous probe exercised three synthetic weekly flows, approval groups, eight-sheet XLSX exports, workspace isolation and cross-origin rejection: 200 checks passed across 61 HTTP requests, with zero provider model calls.

Privacy boundary

This attachment contains no personal email, account identifier, billing information, secret, raw account log or local machine path. Only public project and runtime facts needed for verification are included.
